

Frankfurt station arrival coordination

SIM-FRA-STA-R1 | Revision 1 | STATION

Operator SIM-AIR | ALL | ALL | Station FRA

Status ACTIVE | Trust TRUSTED | Effective 2026-09-01 to 2027-09-01

1. Scope

SIMULATION ONLY. Original fictional planning document. Not an OEM manual, approved MEL, maintenance instruction, flight-safety assessment or release authorization. Frankfurt station staffing, access and service timings in this document are invented.

2. Access

The simulation permits technician access 5 minutes after in-block, not at touchdown. The aircraft is expected to land at 08:40 CEST and reach stand at 08:50 CEST.

3. Preparation

Notify the station team, attach the evidence pack and identify tooling. Gate and stand identifiers beginning SIM- are not real airport assignments.

4. Arrival

At stand, the authorized technician validates the condition and approved work package. An external simulated maintenance-system status records the final outcome; the SLM cannot create a release.
