

Amsterdam contingency movement planning

SIM-LOG-AMS-R1 | Revision 1 | LOGISTICS

Operator SIM-AIR | ALL | ALL | Station ALL

Status ACTIVE | Trust TRUSTED | Effective 2026-09-01 to 2027-09-01

1. Scope

SIMULATION ONLY. Original fictional planning document. Not an OEM manual, approved MEL, maintenance instruction, flight-safety assessment or release authorization. Every quote, carrier movement, cost and cutoff is fictional.

2. Air option

Q-AMS-AIR has 30 minutes source preparation, 07:10Z cutoff, 08:10Z departure, 09:20Z arrival and 60 minutes destination handling. A request at 06:15Z meets the cutoff; the part becomes available at FRA at 10:20Z.

3. Limits

Availability at AMS does not mean the part can reach the aircraft within its turnaround. For the base scenario, this movement is a delayed contingency, not a solution that preserves the 09:00Z departure.

4. Authority

The demo can hold stock after approval. Booking transport remains outside this build. Do not promise delivery from straight-line airport distance.
