

Ground readiness and onward flight impact

SIM-OCC-R1 | Revision 1 | OPERATIONS

Operator SIM-AIR | ALL | ALL | Station ALL

Status ACTIVE | Trust TRUSTED | Effective 2026-09-01 to 2027-09-01

1. Scope

SIMULATION ONLY. Original fictional planning document. Not an OEM manual, approved MEL, maintenance instruction, flight-safety assessment or release authorization. Estimates are scenario calculations, not observed airline performance.

2. Critical path

Estimated departure is the later of scheduled departure and max(maintenance-ready, other-turnaround-ready) plus the dispatch buffer. Independent turnaround tasks are not all summed sequentially.

3. Aircraft swap

Another aircraft parked at FRA is not automatically a spare. Match operator, type, configuration, seats, crew, release availability and subsequent rotation commitments.

4. Metric

Earlier maintenance readiness is not automatically extra flying time. The base fixture retains sufficient schedule buffer for an on-time departure even in the stated sequential-preparation comparison.
